Inside JABA Series #6:
*How to Stop Smoking Using Behavior Analysis:
JABA's Special Series in Public Health and Telehealth*

This Session of the Inside JABA Series provides an overview of Contingency Management (CM) approaches for the reduction or cessation of substances of abuse. Specifically, Dr. Jesse Dallery describes previous CM approaches to smoking cessation, the logistical barriers in these previous studies, and how he and his team developed a novel technology to make the implementation of a CM intervention for smoking cessation more feasible. This technology was empirically evaluated and its outcomes were reported in the Journal of Applied Behavior Analysis (see Dallery, et al., 2020). Dr. Dallery also discusses the roles of Delay Discounting (DD) and punishment in the conceptualization of the CM literature.
